SUMMARY

As someone deeply immersed in data analysis, I've found my passion for using data to make positive changes. My journey as a data analyst has given me a solid foundation in spotting areas for improvement and finding creative solutions.

Beyond crunching numbers, I love being part of different projects, see my analysis transform into action and help bridge gaps between the analysis and implementation.

I'm excited about the opportunity to step into the Senior Data Engineer for Security Analytics role and bring my passion for problem-solving and teamwork to help our company thrive, and upgrade my knowledge in the security industry.

EXPERIENCE

Data Analyst & Project Coordinator Specialist

SAP

📅 04/2024 - Present 📍 Sofia, Bulgaria
